

QUIKRETE® Shotcrete MS – Fiber Reinforced
Hampton, VA

PROJECT DESCRIPTION:

Opened in 1957, Hampton Roads Bridge & Tunnel (HRBT) is a 3.5 mile four-lane stretch of bridges, trestles, man-made islands and tunnels through the main shipping channels for Hampton Roads Harbor. Marksmen Bros. strengthened the foundations of the bridges along the route by repairing the concrete pile caps with QUIKRETE Shotcrete MS

the Micro Silica enhanced shotcrete limited delays for traffic traveling between the City of Hampton and the City of Norfolk in southeastern Virginia.

QUIKRETE

repair material that achieves more than 9,000 PSI at 28 days, and features very low rebound and permeability characteristics.

CONTRACTOR: Marksmen Bros.
